

Traditional, single-track deflection system.

- Nonproprietary system
- Traditional framing components
- Requires U-Channel and EasyClip™ Clip Angles (U-Series™)

This traditional assembly allows for the deflection of floor beams or floor decks above interior partitions. The single, long leg track assembly requires 1-1/2" cold-rolled channel (CHN2) and 1-1/2" x 1-1/2" 16-gauge EasyClip™ Clip Angles (U-Series™), installed continuously throughout the upper most punchouts

(must be a maximum of 12" from the top track), to align the studs vertically within the plane of the wall.

UltraSTEEL™ Long Leg (Deflection) Track (UT-Series™)
