

Spazzer® 9200 Bridging and Spacing Bar (SPZD)

Save up to 40% in combined labor and materials costs!

- Eliminates stud spacing layout at deck
- Improves drywall installation speed
- Automatically positions and rigidly holds studs on 16" or 24" centers without fasteners
- Eliminates clip angles and the labour required to install them

The TradeReady® Spazzer® 9200 bar is a pre-notched, 20-gauge, galvanized steel spacer and bridging bar. The Spazzer® 9200 bar facilitates rapid erection of studs into a rigid, accurately laid out gridwork that has excellent resistance to stud rotation and displacement. Hanging drywall is also faster and easier because the Spazzer® 9200 bar eliminates the bow that often occurs in tall interior studs.

TradeReady® Spazzer® 9200 bar is a 20-gauge bar that is 50" long and pre-notched to hold studs rigidly on 16" or 24" centers. The slots have been pre-engineered to hold studs in place by utilizing "shear" to bridge studs into a rigid gridwork.

U.S. Patent Nos. 5,784,850 and 6,021,618
