

## Custom fabricated shapes, clips, bends, continuous angles, long leg tracks and miscellaneous closures.

- Precision fabrication meeting exacting specifications.
- Wide array of custom options.
- Fully dimensioned part drawings must be provided.

Dietrich custom fabricates just about any shape, bend, angle or specialty framing component to your exact specification. Custom parts include corner angles, roof ridge angles, clip angles, long and uneven leg tracks, eave closures, support clips and furring channels. To ensure proper fabrication, Dietrich requires a detailed, fully dimensioned part drawing at time of order placement.
