

High-quality veneer finishing corner bead provides superior keying for joint compound for one-coat plaster veneer systems.

- Mini-mesh flanges for plaster keying.
- Galvanized or zinc for corrosion protection.
- Universally accepted as Kal-Korner™ alternative.
- Eliminates shadowing and edge cracking.

Dietrich Mini-Bead™ 800 and 900 corner bead are galvanized steel reinforcements for interior, outside corner, veneer or thin wall plaster applications. 1-1/4" wide fine mesh expanded flanges are tapered along the outer edges to enhance veneer plaster concealment. Mini-Bead™ 800 corner bead has 1/16" grounds for one-coat veneer plaster and 90 keys per linear foot for excellent bonding and strong corners. Mini-Bead™ 900 corner bead has 3/32" grounds for two-coat veneer plaster systems. Zinc Mini-Bead™ 900 should be used in exterior finish systems. Flange attachments can be accomplished by either nailing or stapling.

Note: Zinc Mini-Bead™ corner bead should be used in exterior finish systems.

Mini-Bead™ 800 (MB80/ZB80) and 900 (MB90/ZB90)
